1.2 Introduction

Zebra DeFi(ZFI) is a decentralized investment platform based on TRON Network, also a Yield Farming Optimizer. Zebra combines the characteristics of the YFI and Forsage project to build huge communities by providing benefits through Yield Farming and referrals. Zebra runs basing on the TRX smart contract, which is 100% decentralized, non-destructive and fair.

1.3 Team

The Zebra DeFi project is community-sponsored, with contract codes audited by the community and a community vote to determine the project's direction.

No ICO, No pre-miner and No founder token required. The way to get ZFI is by provide liquidity, referral rewards, Yield Farming and transaction. Zebra making DeFi much simpler.

2.1 Yield Farming Optimizer DAPP

The mining patterns of YFII and SUSHI integrated by Zebra:

The total amount injected into the Zebra Liquidity Pool is 850,000, which are evenly distributed among three liquidity pools. Each liquidity pool will be completely distributed in 20 weeks. And the weekly amount will be progressively decreased by 5%.

As the number of people involved in mining increases, the difficulty will continue to increase. Among them, exclusive ZFI liquidity pool yield rate is the highest.

- Total amount: 850,000 ZFI
- Each mining pool(3 in total): 283,333 ZFI
- Each mining pool is cleared in 20 weeks
- weekly amount will be progressively decreased by 5%. It started with the amount of 22,083 ZFI in the first week and ended with the amount of 8,333 ZFI in the 20th week.

2.2 Zebra Liquidity Pool

Earn ZFI token by providing liquidity.

- POOL 1: Deposit ZFI and Earn ZFI
- POOL 2: Deposit ZFI/TRX LP, ZFI/USDT LP liquidity warrants and Earn ZFI
- POOL 3: Deposit main tokens on TRON, such as JST, pearl, salmon, etc. And Earn ZFI (to be decided by community vote)

Farming Calculation

Hourly user income = personal deposit amount / total deposit of mining pool * amount of ZFI released per hour by the mining pool

2.2 Zebra Liquidity Pool

For example:

- Deposit amount: 100 ZFI
- Total deposit amount in mining pool: 10,000 ZFI
- Amount of ZFI released per hour: 85 ZFI

Hourly user income = $100/10,000 * 85 = 0.085$ ZFI

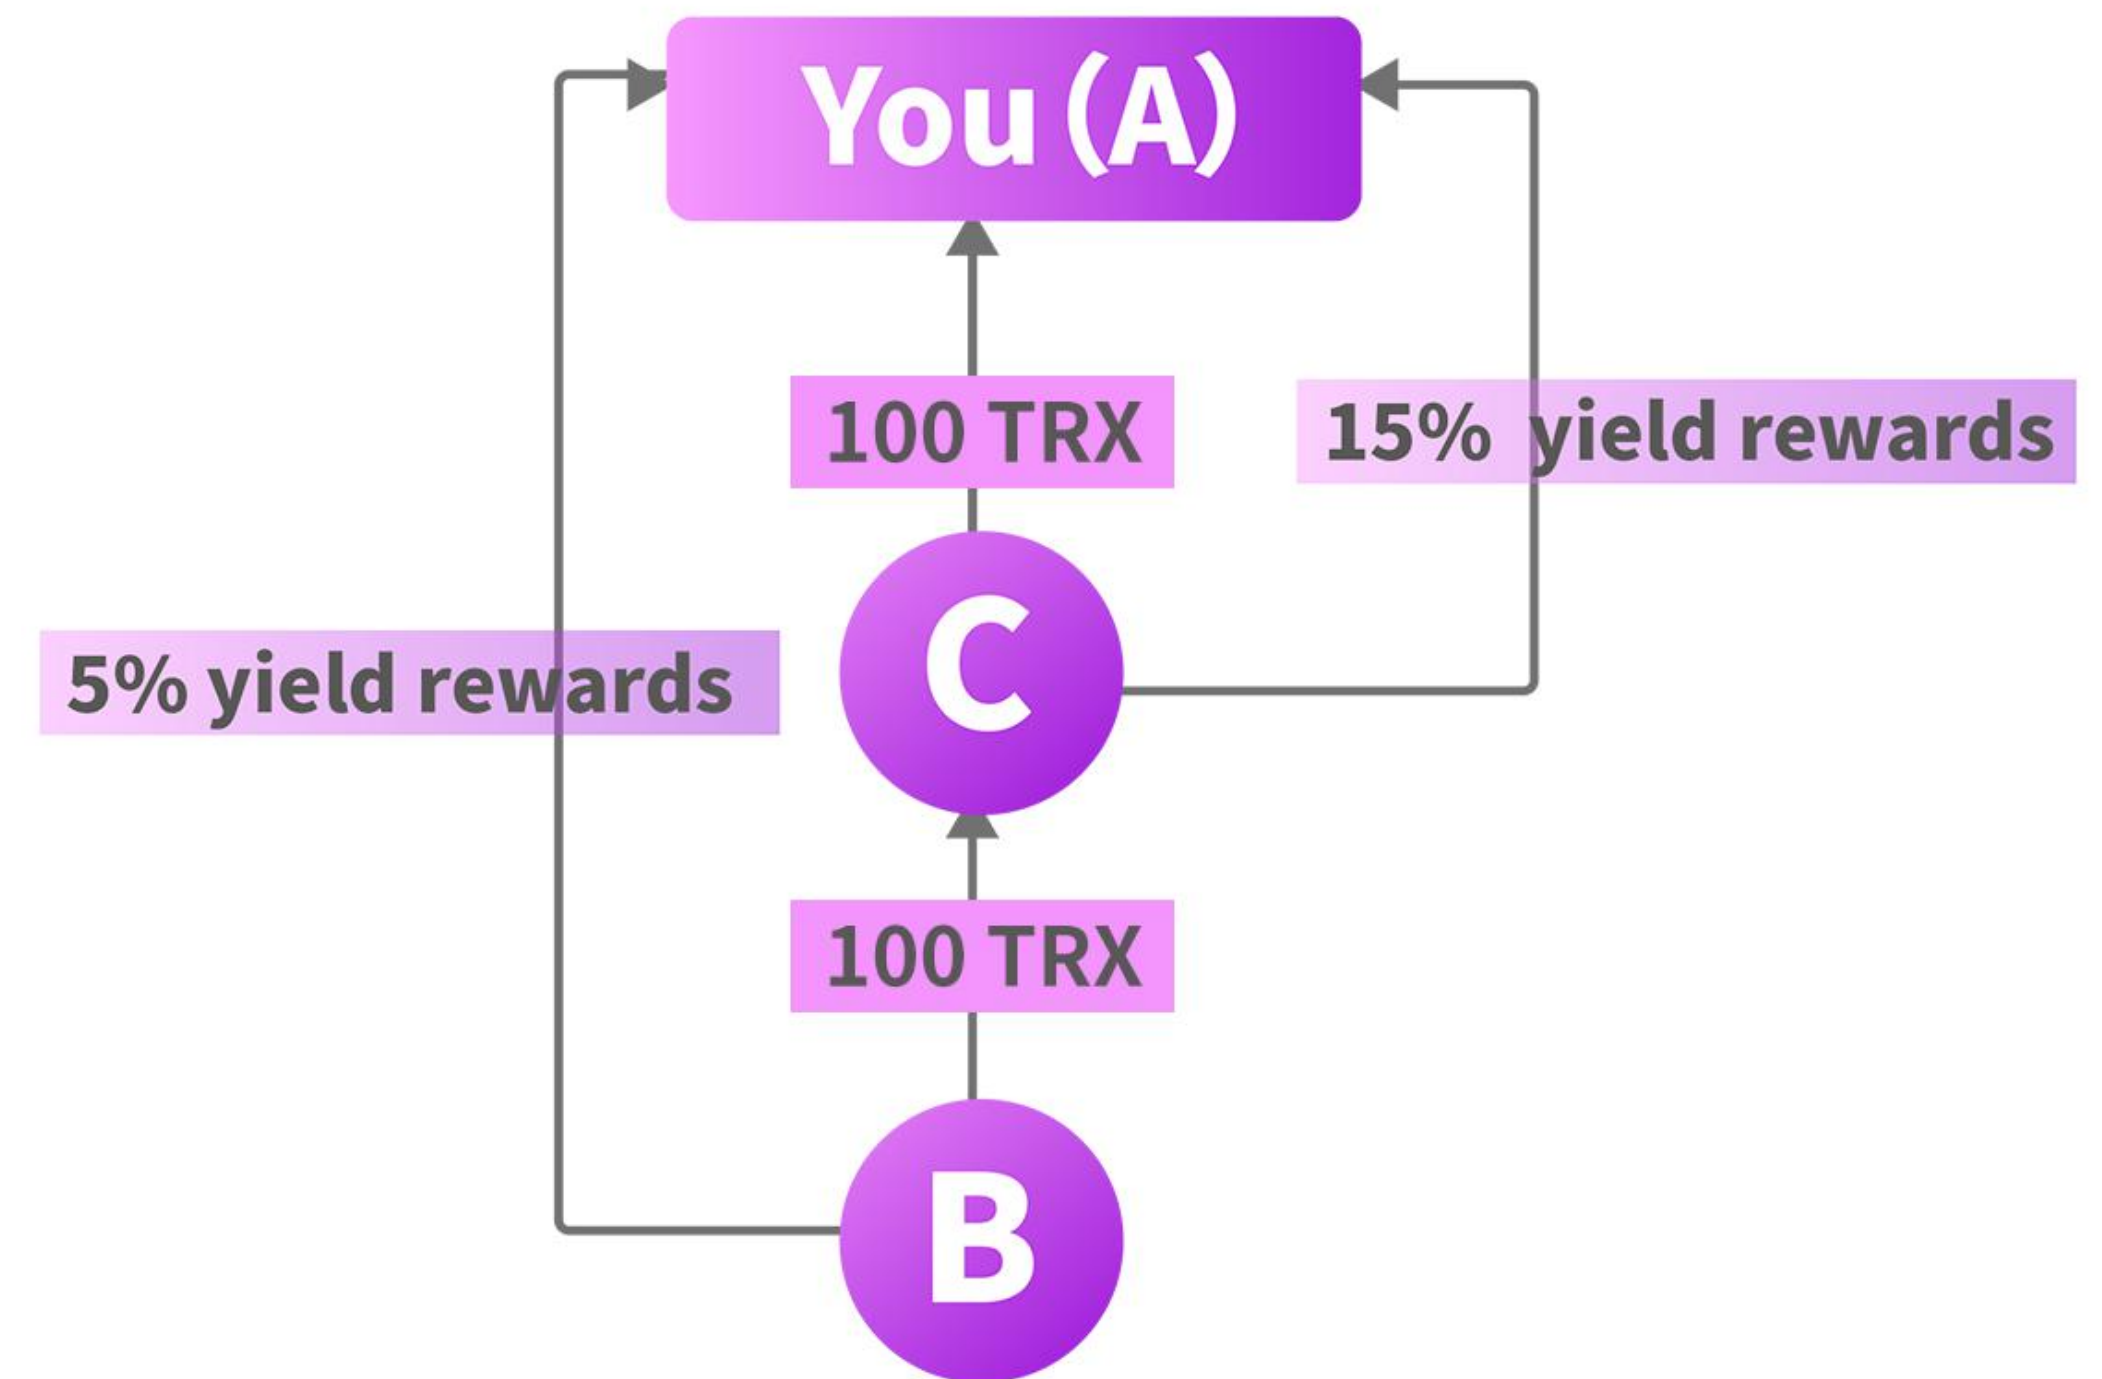

Calculated based on ZFI's mining rate and price increase

- **Hourly rate of return: 0.85%~ 5%**
- **Daily rate of return: 19.2%~ 100%**
- **Monthly return rate: 576% ~ 2000%**

2.3 Referral reward by smart contract

All the users register through the invitation link and pay 100 TRX (about 8USDT) to the smart contract, which will be bound by default to the address of the superior in the invitation link, and the 100 TRX registration reward will be automatically transferred to the superior.

- (1) Get the registration reward(100TRX) of the direct address
- (2) Get 15% mining power reward of the direct address
- (3) Get 5% mining power reward of the indirect address

2.3 Referral reward by smart contract

For example:

- (1) If the direct address deposits 1,000 ZFI, you will get 1,400 ZFI in weekly returns and an extra 210 ZFI in 15% yield reward.
- (2) If the indirect address also deposits 1,000 ZFI, you will get 1,400 ZFI in weekly returns and an extra 70 ZFI in 5% yield reward.

ps:

-A invite B and B invite C and D

-B stands for the direct address of A

-C/D stands for the indirect address of A

*All TOKEN distribution is completed on Smart Contracts.

2.4 Project Highlights

- Zebra operates on an TRON smart contract that is 100% decentralized and addresses the issues of the collapsed project and disappeared funds.
- The world's first mining referral rebate mechanism with smart contract. Inviting friends to get TRX rewards, and wins 20% of friends' yield reward.
- Popular token and liquidity warrants can Deposit ZFI and get mining with the benefits of longer mining cycle and more stable token price.
- The Zebra project will be community autonomous, with no ICOs, no pre-miner, and no founder tokens.
- All the funds raised will be put into Justswap flow pool to remain the bottom price . (The target financing amount is 10,0000 USDT, and the purchased token will be released in 10 batches.)

2.5 When was Zebra DeFi launched?

Zebra Private Sale: 09/10/2020 UTC 16:00

POOL 1 Opening time: 09/14/2020 UTC 14:00

POOL 2 Opening hours: To be determined

POOL 3 Opening time: To be determined

3.1 ZFI Token distribution

Symbol: ZFI

Total supply: 1,000,000

Contract address: TFHyQvBcqMeL5yq7y1dHJutzZX4YqLRzhe

5% Private Sale: 50,000

5% JustSwap Pool: 50,000

5% referral reward: 50,000

85% Yield Farming reward: 85,000

3.2 Rules for Private Sale

Total amount: 50,000(5%)

Price: 1 ZFI = 60 TRX (TRC20)

Target Financing: 3,000,000 USDT

Use of funds: 100% to be invested in the JustSwap pool

3.3 Private Sale Unlocked

Private sale will be unlocked 20% once a week(5 weeks in total). Unlocked for the first time with the First investment and the unlocked ZFI automatically transfers to the address of the participant.

3.4 Token Design

Thank you for joining Zebra DeFi (ZFI). We aim to maximize your benefits from your participation in providing liquidity on JustSwap. By joining Zebra DeFi , you are going to earn:

- Trading fees from JustSwap from ZFI/TRX trade pair which you provide liquidity in.
- Deposit your JustSwap liquidity LP token like ZFI/TRX LP and ZFI/USDT token on Zebra Pool to earn \$ZFI.
- Deposit ZFI, TRX, JST, PEARL,and USDJ token, Earn \$ZFI
- Refer your friends to deposit in Zebra through smart contracts, and you will get 20% ZFI rewarding by your friends' Yield
- According to the governance mechanism of Zbra Defi, the value of ZIF will continue to rise.
- With \$ZFI, you can obtain the governance and voting rights of Zbra, and participate in other Defi yield farming to obtain more yield farming revenue.

\$ZFI is limited to 1,000,000 tokens in total. The earlier you join ZFI and the more value you will harvest.

4.1 How does the founding team make profit?

When a user registers without invited link, he/she will be bound for the root node by default. The revenue of the root node is the project reward of the founding team.

As the largest root node, the revenue of that is enough to feed the team and also has a surplus.

Founding team commitment as below:

- (1) They will take out 60% of the registration referral reward(TRX), used to buy back ZFI, and permanently destroyed.**
- (2) They will spend 60% of the mining referral reward(ZFI), for the community and the reward of active participants.**

4.2 100% Decentralized Zebra

All Token allocation is carried out on the smart contract without founder shares, reviewed code, community voting autonomy.

Zebra is a 100% decentralized blockchain project.
